

# Sediment Remediation, Closure of Confined Disposal Facility Iron Mountain Mine, Redding, California CH2M Hill/U.S. Environmental Protection Agency

**Value:** \$3.8M

**Location:** Redding, California

**Period of Performance:**

6/2011 – 10/2011

**Client:** CH2M Hill

- Closure of the confined disposal facility (CDF), an approximate 12-acre cell containing contaminated sediment dredged from Keswick Reservoir in 2009 and 2010.
- Site facilities, subgrade preparation, excavation of select material, placing embankment, and drainage utilities necessary for closure of the CDF.
- Excavation, transportation, and placement of approximately 3,000 cubic yards of contaminated sediment from the Spring Creek Debris Dam (SCDD) outlet and spillway located below the CDF
- Dust control at all access roads,
- Storm Water Best Management Practices (BMP)
